

# Features by Version

## v1 – Foundations

- **class.division.id:** Librarian-style classification (0–9 classes, divisions like 1.140 for Ideas).
  - **Core node labels:** Idea, Person, Institution, Place, Event, Movement, Artifact/Text, Evidence.
  - **Authoritative citations (seeded):** Chicago-style required, emphasis on peer-reviewed / scholarly.
  - **Corpus discipline (A–D):** Primary, Peer-reviewed, Scholarly press, Institutional.
  - **Active voice relationships:** All verbs active, verb-first (e.g., **INFLUENCES**, **OCCURS\_IN**, **FRAMES**).
- 

## v2 – Structured Schema

- **Node properties:** **name**, **slug**, **definition**, **category**, **context**, **place\_type**.
- **Place subtypes:** Civilization, Tribe, Country, Region.
- **Idea categories:** Political, Legal, Scientific, Religious, Economic, etc.
- **Evidence vs Citation:**
  - Evidence = reusable nodes.
  - Citation = inline property on relationship.
- **Chronology improvements:** negative years for BCE, numeric comparisons.
- **Avoid redundancy:** constraints, MERGE instead of CREATE.

- **Generic vs Contextual nodes:**
    - Generic timeless hubs (e.g., Rome).
    - Contextual supporting nodes (e.g., Roman Empire 27 BCE–476 CE).
- 

## v3 – Framework Tags & Historian Lenses

- **Historian Frameworks (first draft):**
    - Cause & Effect, Continuity & Change, Cultural Diffusion, Precedent, Symbolism, Influence, Conflict, Temporal Linkage, Geopolitical Linkage, Adaptation.
  - **Framework Tags** on relationships (before v4 made them nodes).
  - **Extended framework registry for politics:** Idea Evolution, Institutional Codification, Policy Implementation, Conflict & Resolution, etc.
  - **Conflict & Resolution:** captures opposition (**OPPOSES**, **CHALLENGES**).
  - **Technological Disruption** and **Cultural Transmission** frameworks introduced.
  - **Governance framework (proposed):** curator workflow → Propose → Cite → Frame → Place → Review → Version.
- 

## v4 – Current Operating Standard

- **EventWindows:** canonical time-bound events with **startYear**, **endYear**.
- **Epoch/Era/Period hierarchy:**  
`(:Period)-[:OCCURS_DURING]->(:Era)-[:OCCURS_DURING]->(:Epoch).`
- **Frameworks as first-class nodes:** explicit `(EventWindow)-[:FRAMED_BY {citation}]->(Framework).`
- **Evidence & citation policy:**

- Required on every FRAMED\_BY edge.
  - Must include stable DOI/URL, page refs, source note.
  - Citation style standardized (Chicago 17).
  - **Data hygiene rules:**
    - Uniqueness constraints per label.
    - Temporal sanity:  $\text{startYear} \leq \text{endYear}$ .
    - Relationship fingerprinting (prevent duplicate FRAMED\_BY).
  - **Chronological ordering:** `chron_key` = integer (YYYYMMDD), dynamic rendering for front-end ordering.
  - **Region norms:** UNESCO/Oxford bins (Asia, East Asia, etc.), Place kinds (region, country, empire, city, culture-area).
  - **Governance & registry:** Framework registry fixed; new frameworks require RFC + evidence.
  - **QA validation queries:** Missing Era, missing Place, duplicate frameworks, anachronism scan.
  - **Versioning of links:** old citations retired, not overwritten.
- 

## v5 (Proposals & Extensions)

- **Governance Framework (curator workflow):**
  - **Propose** → **Cite** → **Frame** → **Place** → **Review** → **Publish** → **Version**.
- **E39 Agent compliance** (CIDOC CRM): unify Persons & Institutions under `Agent`.
- **Authoritative citations coverage checks:** require at least one Primary + one Peer-reviewed per critical edge.

- **Evidence corpus tagging:** PRIMARY\_CORPUS, PEER\_REVIEWED, SCHOLARLY\_PRESS, INSTITUTIONAL\_REPORTS, (future: Archaeological, Quantitative, Oral).
  - **Dynamic rendering of division.id:** `class.division` static for classification, `chron_key` dynamic for order.
  - **QA dashboards:** measure citation coverage, corpus mix, active-voice compliance, chronological flow.
  - **Cross-cultural comparability:** align with UNESCO chronology bins across civilizations.
- 

## Master Feature List (Concise)

- **Classification:** `class.division.id` (call numbers).
- **Chronology:** `chron_key` for ordering, negative years for BCE.
- **Corpus discipline:** A–D corpus tiers (primary → institutional).
- **Evidence model:** Evidence nodes + per-edge citations (Chicago 17).
- **Frameworks:** Historian frameworks (Cause & Effect, Cultural Diffusion, etc.), first-class nodes since v4.
- **Agents:** E39 Agent model (CIDOC CRM) for Person & Institution.
- **Relationships:** Always active voice, verb-first, semantically normalized.
- **Generic vs Contextual nodes:** timeless hubs vs specific contextual instances.
- **Event hierarchy:** Epoch → Era → Period → EventWindow.
- **Governance workflow:** Propose → Cite → Frame → Place → Review → Publish → Version.
- **Constraints & hygiene:** uniqueness, temporal sanity, no floating concepts.
- **QA checks:** coverage audits, anachronism scans, passive-voice audits.

- **International alignment:** UNESCO chronology bins, CIDOC CRM classes, Dublin Core for bibliographic data, PROV-O for provenance.
- **Cluster nodes + membership edges** (active voice)
- **Cluster Hierarchy**

You're right—we need a **canonical Corpus Registry** (cultural/linguistic primary-source traditions) in addition to the **corpus tiers** (A–D) we already use. Here's the concise, convention-first setup.

## Corpus model (what it is)

- **CorpusTier (A–F)** → evidence **type**:  
A Primary · B Peer-Reviewed · C Scholarly Press · D Institutional · (*E Archaeological · F Oral/Quantitative — optional*)  
(Store as `Evidence.corpus_tier`.)
- **Corpus (cultural / textual traditions)** → evidence **origin family** (Bible, Mesopotamian, Indic, etc.).  
(Model as `(:Corpus)` and link **Evidence** → **Corpus** with active verb **BELONGS\_TO**. Multiple allowed.)

## Canonical Corpus Registry (concise)

### Ancient Near East & Mediterranean

- `MESOPOTAMIAN_CORPUS` — Sumerian/Akkadian: *Enūma Eliš*, *Gilgamesh*, royal inscriptions.
- `EGYPTIAN_CORPUS` — Pyramid/Coffin Texts, *Book of the Dead*, king lists.
- `BIBLICAL_CORPUS` — Hebrew Bible/Tanakh, Septuagint, NT, DSS.

- [JUDAIC\\_RABBINIC\\_CORPUS](#) — Mishnah, Talmud, Midrash.
- [GRAECO\\_ROMAN\\_CORPUS](#) — Greek/Latin literature & philosophy; **Roman Law** (*Corpus Iuris Civilis*).
- [CANON\\_LAW\\_CORPUS](#) — Gratian's *Decretum*, papal decretals, councils.

## Iran & Central/West Asia

- [IRANIAN\\_ZOROASTRIAN\\_CORPUS](#) — *Avesta*, Pahlavi texts.
- [ISLAMIC\\_QURAN\\_HADITH\\_CORPUS](#) — Qur'ān, canonical ḥadīth collections.
- [ISLAMIC\\_FIQH\\_KALAM\\_FALSAFA\\_CORPUS](#) — madhhab law, kalām, falsafa.
- [PERSIANATE\\_CHRONICLE\\_CORPUS](#) — *Shāhnāmeḥ*, *Bāburnāma*, court histories.
- [OTTOMAN\\_ARCHIVE\\_CORPUS](#) — kanunnames, tahrir defterleri (administrative registers).

## South & Southeast Asia

- [INDIC\\_VEDIC\\_UPANISHAD\\_CORPUS](#) — Vedas, Brāhmaṇas, Upaniṣads.
- [INDIC\\_EPIC\\_DHARMA\\_CORPUS](#) — *Mahābhārata*, *Rāmāyaṇa*, *Arthaśāstra*, Dharmaśāstra.
- [BUDDHIST\\_PALI\\_CANON](#) — Pāli *Tipiṭaka*.
- [BUDDHIST\\_MAHAYANA\\_CORPORA](#) — Sanskrit/Chinese/Tibetan canons.
- [SE\\_ASIAN\\_INSCRIPTIONAL\\_CORPUS](#) — Khmer, Javanese, Thai, etc. inscriptions & chronicles.

## East Asia

- [SINIC\\_CLASSICS\\_CORPUS](#) — Five Classics, Four Books, dynastic histories, military classics.
- [JAPANESE\\_CLASSICAL\\_CORPUS](#) — *Kojiki*, *Nihon Shoki*, ritsuryō codes.

- **KOREAN\_CLASSICAL\_CORPUS** — *Samguk Sagi/Yusa*, codes, chronicles.

## Africa (beyond Egypt)

- **ETHIOSEMITIC\_GEEZ\_CORPUS** — *Kebra Nagast*, chronicles.
- **TIMBUKTU\_MANUSCRIPT\_CORPUS** — Arabic scholarship of the Western Sahel.
- **AFRICAN\_ORAL\_EPI\_CYCLE** — epics like *Sundiata* (documented transcriptions).

## Americas

- **MESOAMERICAN\_CORPORA** — Maya/Aztec/Mixtec codices; Nahuatl annals.
- **ANDEAN\_CORPUS** — khipu records, early chronicles.

## Technology / Science (primary technical traditions)

- **MILITARY\_TECHNICAL\_CORPUS\_EARLY** — Chinese, Islamic, European ordnance & military treatises.
- **EARLY\_MODERN\_SCIENCE\_CORPUS** — e.g., *Philosophical Transactions*, academies (as **primary** when citing original papers).

Keep these **focused on primary traditions**; modern monographs/journals stay in tiers B–D, not in cultural corpora.
